WHITEPAPER

About the Project

Date Booms is a crypto game project about battles in the Middle Ages. Players collect points by fighting various battles in the game. With these points, they can buy NFTs or convert them into DTBOM tokens.

The game consists of various war scenarios. In these scenarios, players act as the commander of an army and lead their army against the enemy. Players who succeed in battles earn more points.

1- Decentralized Finance Context

Decentralized Finance (DeFi) refers to an ecosystem of financial applications that are built on top of a blockchain. Its common goal is to develop and operate in a decentralized way, without intermediaries.

According to DeFi Pulse the amount of money invested in DeFi projects soared from about $950 million in the latter part of May 2020 to more than $9.5 billion by the first week of September of the same year and have already been deployed (locked-in) across a variety of DeFi applications that offer decentralized exchange, staking, liquidity mining, lending and borrowing, monetary banking (e.g. the issuance of stablecoins), tokenization, or other financial instruments such as derivatives and prediction markets.

In that sense, DeFi is about creating a network of financial services that seamlessly function without the need for intermediaries that could hold an unfair and inefficient controlling stake in the operation of the system

However, cryptocurrency and decentralized finance are new concepts that can be confusing and risky for customers to get involved with. Proposed tools are complex and young, which hinders access to mainstream adoption. Early 2021, we cannot yet call this financial architecture "open finance" - when new users have to pass through difficult loops to participate — hence, the need for simplified interfaces that democratize DeFi and make it accessible to a larger audience.

2- Crypto Faucets Context

A crypto faucet is an app or a website that distributes small amounts of cryptocurrencies as a reward for completing easy tasks. However, in the case of crypto faucets, tiny amounts of free or earned cryptocurrency are sent to a user's wallet. In order to get free crypto, users need to complete tasks as simple as viewing ads, watching product videos, completing quizzes and surveys, clicking links, or completing a captcha.

Though cryptocurrencies have had great last years, they are yet not completely mainstream and are still new to many people around the world. The idea behind crypto faucets is to give free cryptocurrencies to people, so they would take the time to learn about digital assets and hopefully invest in them.

3- Next Gen Crypto Faucets

Usually, users need to register on a crypto faucet by entering their details along with their wallet address. After solving a task on the website, the reward earned goes to a micro wallet: a wallet similar to traditional wallets, but one which is capable of collecting small amounts of crypto assets by using an off-chain mechanism. This way permits to avoid blockchain network fees as it uses API endpoints to execute micro-transactions. Micro Wallets are useful to collect micro-amounts of High Fee Coins like Bitcoin or Ethereum, but their interest decreases when it comes to collecting other coins with low fees, as the fee is lower, the minimum required to withdraw from crypto faucets can be lowered too.

That is why Some Crypto Faucet has chosen to integrate an internal wallet to permits users to withdraw their crypto directly to the blockchain. It is the case of Desert Wars NFT.

4- Binance Smart Chain: A Bridge Between DeFi and Crypto Faucets

Due to its fully functional network with high scalability, quite low transaction fees, and 3- second block times, BNB Smart Chain (BSC) has become a leader among Ethereum rivals.

Binance Smart Chain is the second blockchain launched by the cryptocurrency exchange Binance. The First Binance Blockchain (Binance Chain) lacks most of Ethereum's functionality and flexibility, while the Binance Smart Chain is compatible with the Ethereum Virtual Machine (EVM) and supports smart contracts.

As a result, developers can launch their Ethereum DApps on the Binance Smart Chain with minimal configuration, allowing many crypto projects to migrate quickly to the latter chain to avoid ETH's high transaction fees.

Binance Smart Chain has seen immense popularity since the beginning of 2021, thanks in part to congestion issues and high transaction fees on the Ethereum network. All of this has caused many developers and investors to seek alternatives such as BSC.

In February 2021, the BSC community made the network even more attractive to new users as a low-cost and stable alternative, doing so by reducing its gas fees from 15 Gwei to 10 Gwei. This is to counteract the sharp increase in the price of the Binance Coin (BNB), which exceeded $300 in February 2021.

This is why Binance Smart Chain is actually a nice way:

For Crypto Faucets Users : to learn about Dapp mechanisms and to get access to DeFi opportunities without paying high fee. For Crypto

Faucets Owners : to take a step towards decentralization by integrating DeFi features to their website.

Desert Wars (DESWAR) is the first token that allows users to learn about DeFi while receiving a Bonus on a crypto faucet.

5- Towards a Cross-Chain Environment

The smart chain binance is a good way to introduce people to the DeFi, but the costs remain relatively high, especially when it comes to making micropayments, this is the case of crypto-faucets as well as all the semi-centralized Micro-Earning crypto services.
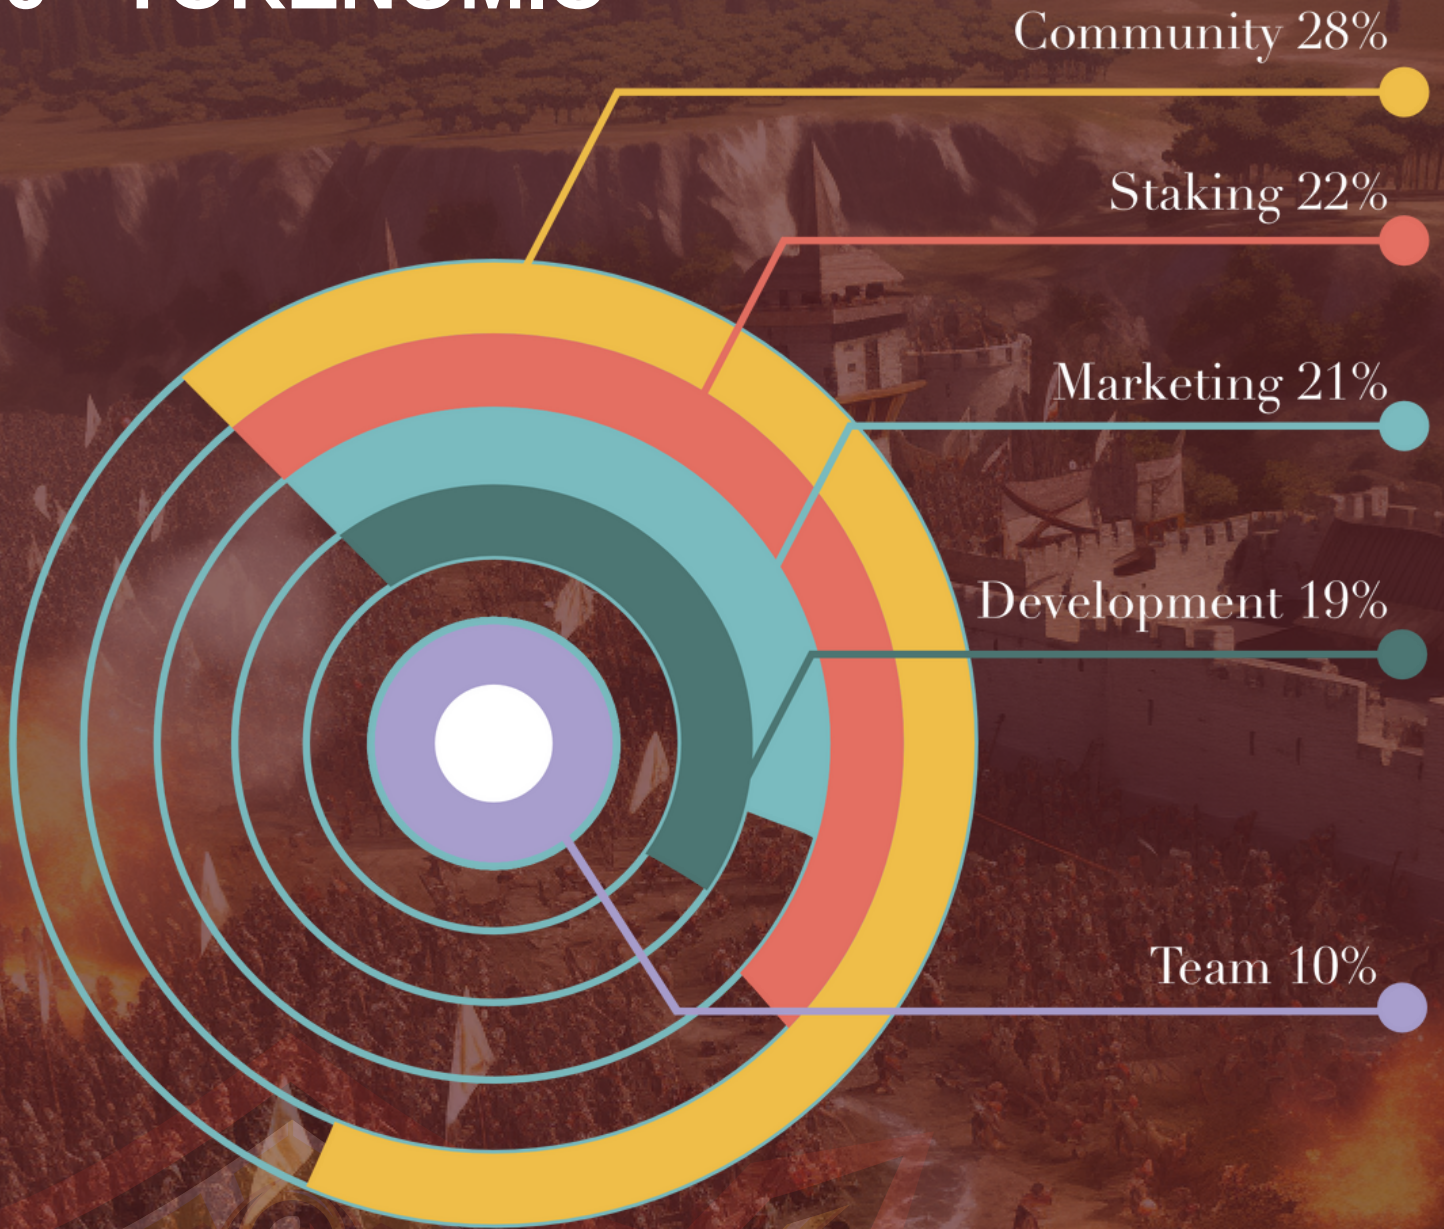

If we want to be totally free of centralized systems (MySQL, RESTful API etc) in the world of micropayment, we need a blockchain capable of performing transactions almost instantly and with lower costs.

Furthermore, a Cross-Chain Environment for a micro-earning service can bring a lot of simplicity to the user, especially when the service offers many crypto tokens to earn, it can avoid having to enter many addresses to withdraw his funds. For example, instead of having to enter the addresses of the native DOGE, BTC and ETH networks, the user will just have to enter his Binance Smart Chain (or Tron, Ethereum, Polygon…) address and will be able to make all his withdrawals on it.

DESWAR Token will be available on different blockchains in the future, to allow third parties to find the best technology for their business and to improve crypto faucets user's experience by permitting the transfer of all cryptocurrencies to one or two public address(es).

DATE BOOMS

7 - ROADMAP

Step 1: The First Step of War

We have created a strong team of war heroes and rolled up our sleeves to prepare a unique medieval game for you.

We also worked with this strong team on all phases of the project, building today's habits into every aspect of the game to achieve the triumph of the Middle Ages

Q1 2023

Step 2: The Legend Continues to Evolve

We built maps with some of the best graphics in history, created unique characters, built the game engine and pre-released the unique experience for you.

Q2 2023

Step 3: Dazzle with a Unique Pre-Presentation

We are excited to present the first version of Date Booms, a medieval legend with excellent graphics, as a beta.

Q1 2024

Step 4: Savor the Victory

Your demands are never left behind with us. And you can't have a perfect earning system without Date Booms. We will be happy to release the latest and first version for you.

Q2 2024
